

- **FEATURESOPERATIONNotice:**
- Each size suit for plate type & round type steel using. All new models with "light weight" less dimension" and "lower price".
- Made by permanent magnet, require no power supply, thus eliminating hazards due to failure wiring system as electric type.
- It features powerful magnetic force, with 3.5 times safety coefficient makes more safety in use.

OPERATION

With ON/OFF switch, it is very easy and convenient to operate.

See as the example pictures as below

Notice:

Never moves the handle to "ON" side, except on an iron object of holding.

Never operate over human's head.

Permanent Magnetic Lifter 🔼 📜 🔼 (ON/OFF Type)

APPLICATIONS

 Suitable for move plate steel, block steel and round steel, such as machine parts, press molds, plastic molds and iron materialetc.

LOAD OF HOLDING POWER

 The load of holding power will changes depending on the thickness, attractive face roughness and quality of material and clearance between the workpiece with magnet.

Table of difference in holding Table of difference in holding power by material quality power by attractive face For all models roughness For all models 100% $\nabla\nabla\nabla$ M1 Low carbon 100% 125% F2 $\nabla\nabla$ M2 Moderate carbon 85% 100% F3 ∇ М3 90% High carbon 75% F4 70% 65% Cast iron Calculating Formula for (TxFxMxCapacity of Lifter) "Range of Lifting Capacity" Example:

Terms of workpiece: T8, F1 and M2

90% x 125% x 85% x 600kgs (VML-600)=573kgs

SAFETY COEFFICIENT x 3.5 times

The capacity of magnet indicated as 1/3.5 of holding power, it means the real holding power is 3.3 times of capacity. For example the capacity of VML-600 is 600kgs (1320lbs) but the real holding power is 1980kgs (4350lbs).

The large safety coefficient is consideration for ensuring the use in safety.
